

# Beyond Scrum? Enterprise level Scrum!

May 2<sup>nd</sup>, 2012

# Agenda

Topic	Presenter
Word of Welcome PMI	Kris Troukens Michaël Cauchie
Scrum/Agile shaking up your project	Gunther Verheyen
What about Distributed Scrum?	Venkatesh Upadrista
Enterprise Scrum: transformation in action	Henk Kolk
Panel discussion with expert group, starting with 5 min intro on: <ul style="list-style-type: none"><li>• Growing to Agile Project Portfolio Management</li><li>• Scrum Agile Full Lifecycle</li></ul>	Yves Vervloesem Edgar van Buuren
Closing Words PMI	Kris Troukens
Buffet & Networking	

# PDU Code Today

02 MAY : Capgemini

**PDU: 133-20120502**

# Upcoming Events

**31 MAY : Strand Associates**

**TOPIC :** “Fundamental changes in payments for 2015-2020”

**SPEAKER :** Leon DHAENE

**Location :** PLAZA HOTEL BRUSSELS

**14 JUNE : Dr. Harold Kerzner**

**TOPIC :** “Project Metrics, KPIs and Dashboards”

**Location :** DOLCE LA HULPE ( morning session )

**20 JUNE :**

**TOPIC :** tbc

**Location :** VOLVO AALST

# PMI BeLux Day 2012

- Above and Beyond PMBoK®
- Location will be in Transinne
- [www.pmibeluxday.org](http://www.pmibeluxday.org)
- 200 participants are expected.
- More volunteers are needed for the 6th of October.

# PMI BeLux Day 2012

- PMI Lille will help in the organization.
- Call for Speakers and sponsors is initiated.
- Interested in volunteering, sponsoring or speaking on the 6th of October – Contact Bassam SATER

# Scrum/Agile shaking up your project

*(to shift or not to shift - the software industry paradigm)*

Gunther Verheyen  
Global Scrum Leader Capgemini

# There's a lot to say about Scrum.

*What about some basics?*

# How do you see the world? A **VOLCANO** of constant and apparently uncontrollable disruptions?

*Liberated markets*

*Market pressure*

*The consumerization of IT*

*Legislations and regulations*

*Unstable stakeholders*

*Technical integration*

*Collaborative competition*

*Strategy revisions*

*A global economy*

*Distributed skills*

*Stakeholder impatience*

*Shrinking lead times*

*Dispersed decision taking*

*“Have you got an app for that?”*

*“Is there an update for that?”*

*The age of twitter*

*Fast media coverage*

*Competing opinions*

*Stakeholder impatience*

*Shrinking lead times*

*Dispersed decision taking*

*“Have you got an app for that?”*

*The must of mobile*

**It BURNS your PLATFORM. All the time.**

**You can deny it, but you cannot escape it. Your ICEBERG is melting.**

You seek control. You can't manage it all, and  
become a **FIREFIGHTER**.

*Because every unforeseen event is a **CRISIS**.*

The firefighter act isn't helping. You're still lagging behind. *All the time.*

*Did you miss the train to **EXTREMISTAN?***

*Do you still hang on to ancient control models?*

The old models are part of the industrial paradigm that ruled the software industry.

*Superior staff designs and plans the executable tasks for workers under hierarchical supervision.*

In the 90's, finally, the significant anomalies of the old paradigm gave rise to a new one.

*Agile software development restored the respect for people and creativity.*

**Scrum** became the Agile gorilla,  
the leading Agile framework.

**Scrum**

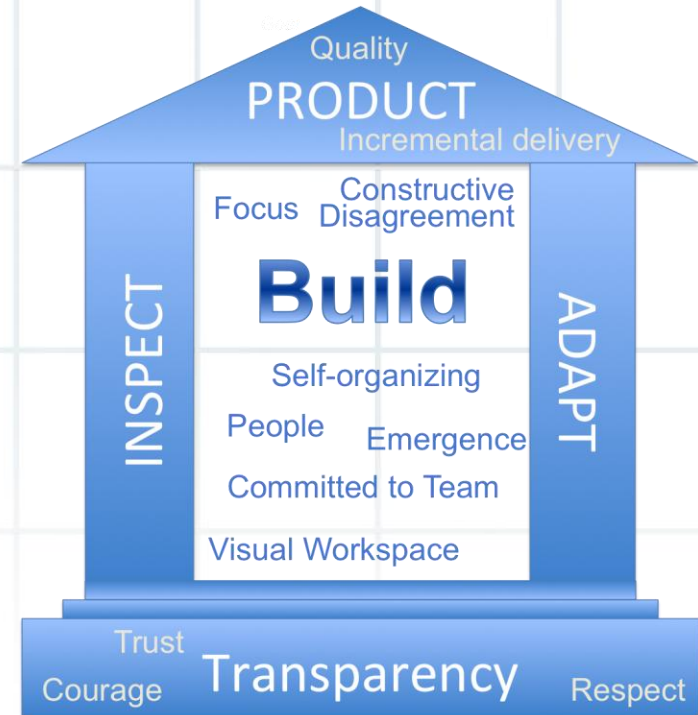

*Use Scrum to sense, probe and adapt. At all levels.  
To build better software. Faster. In 30 days, or less.*

The distinct rules of Scrum help to absorb the new paradigm.

The **HOUSE OF Scrum** protects us from rigid behavior.

# Scrum opens up a world of opportunities:

- Process ⇨ Scrum Master
- Budget / Ordering ⇨ Product Owner
- Technical Tasks & Quality ⇨ Development Team

Move away from	Move towards
Coordinating individuals and individual contributions	Coaching people and teams
Provide answers as a subject-matter expert	Be a servant-leader
Invest in specific outcomes	Facilitate teams into high performance
Measure by deadlines and technical solutions	Focus on the flow of Value
Fixing problems	Take it to the team

# Thank you

# What about Distributed Scrum?

Venkatesh Upadrasta  
Client Delivery Executive

# Distributed SCRUM

## Adopting SCRUM where

- Groups/teams working on a shared-goal but located in different geographies
- The sponsors, end-users and the development teams operating from different locations
- Organizations are involved with multiple vendors across various geographies

# What makes Distributed Scrum Challenging

Time Zone

Cultural  
Differences

Planning /  
Tracking  
& Work  
Distribution

One Voice

Team Organization  
&  
Cross Functional  
Skills

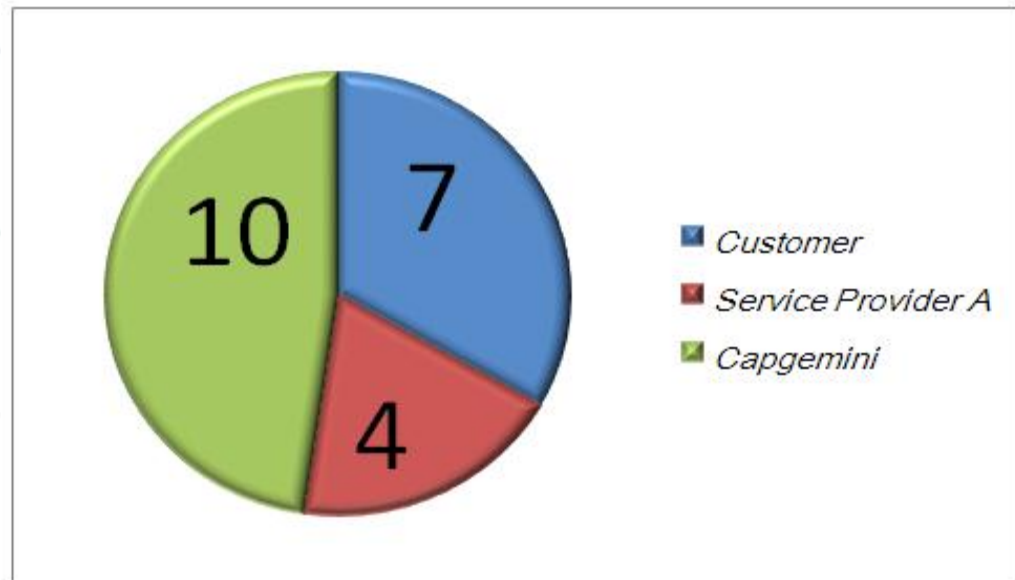

Communication  
& Collaboration

# Distributed Scrum best practices

# A Large Financial Services Customer in Belgium

- Start of project: January 2012
- All delivery via Scrum Teams:
  - Mixed Teams (Capgemini + Customer resources + Other Service Provider)
  - Two Scrum Masters
  - 21 Team members

# Respect & follow values of Scrum

**RESPECT THE PROCESS**

- **A Real Scrum Master**
- **Train & Coach ALL Teams**

- **Understand Scrum Roles**
- **Inspect and Adapt**

# Travel on Both sides

**New to: Scrum + Project**

- **High Frequent**

**Experienced: Scrum + Project**

- **Less Frequency**

# It's One team

## Capgemini One Team Delivery Model

*Capgemini fully includes your people in distributed Team delivery. We know how combine low cost offshore delivery with ownership and commitment of your own people.*

...as in Rugby, the ball gets passed within the team as it moves as a unit up the field

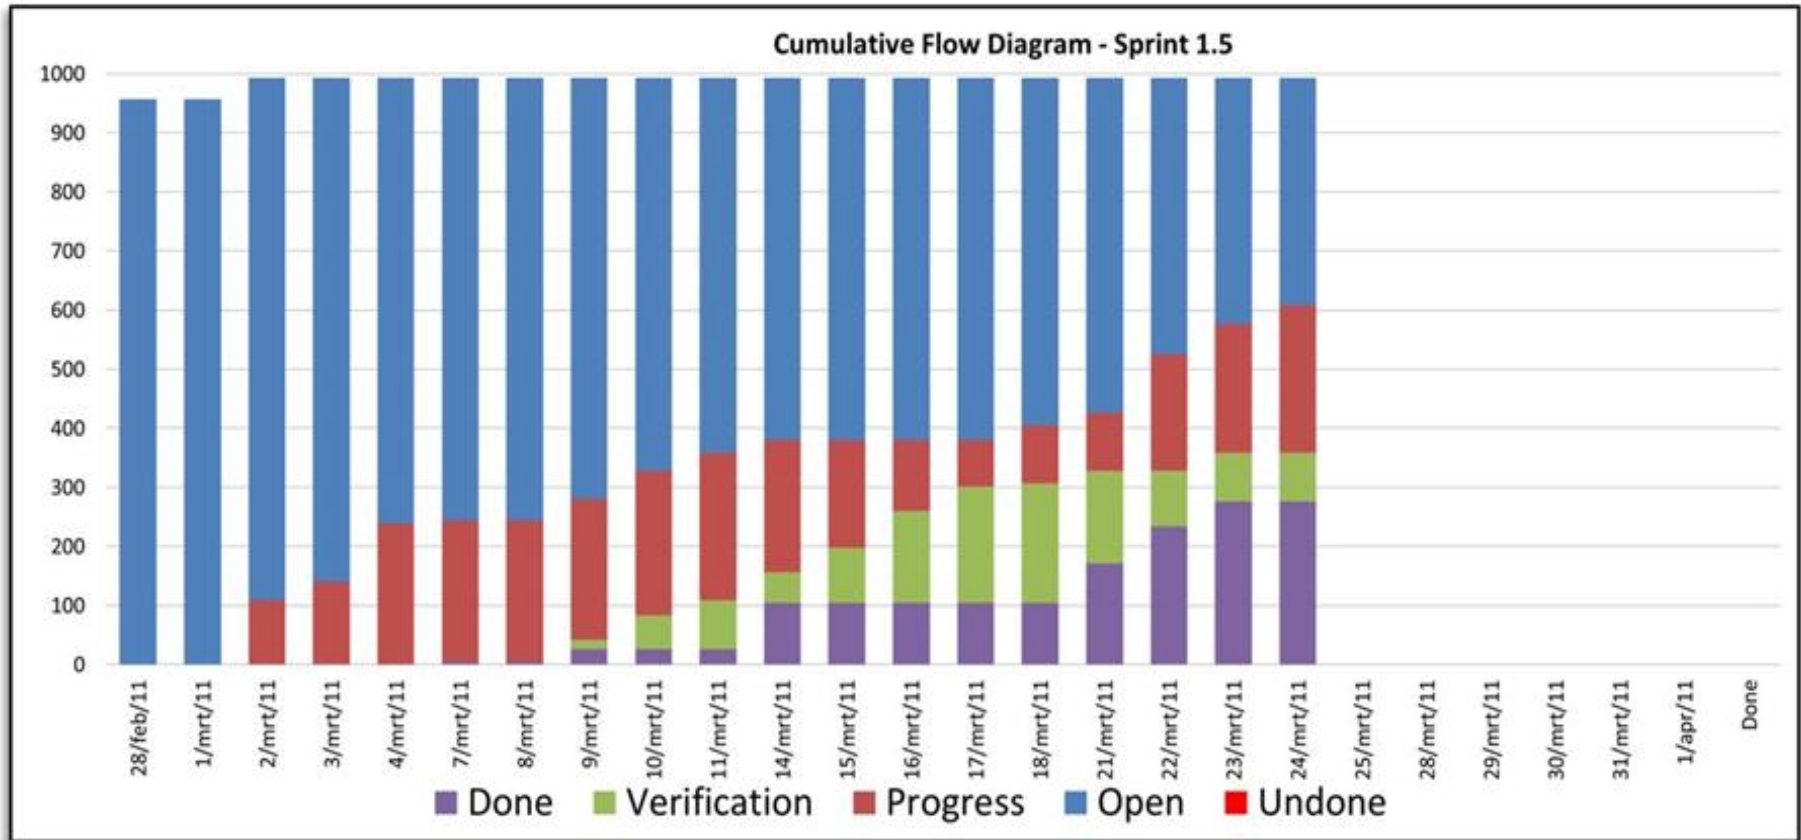

- Engaging the team who understands and experienced One Team

# Use state of art communication tools

- **As from Sprint 1 :**
  - Video Conference
  - Remote Electronic White Boards (Pilot phase)
  - Instant Messengers always ON
  - Sprint Retrospective

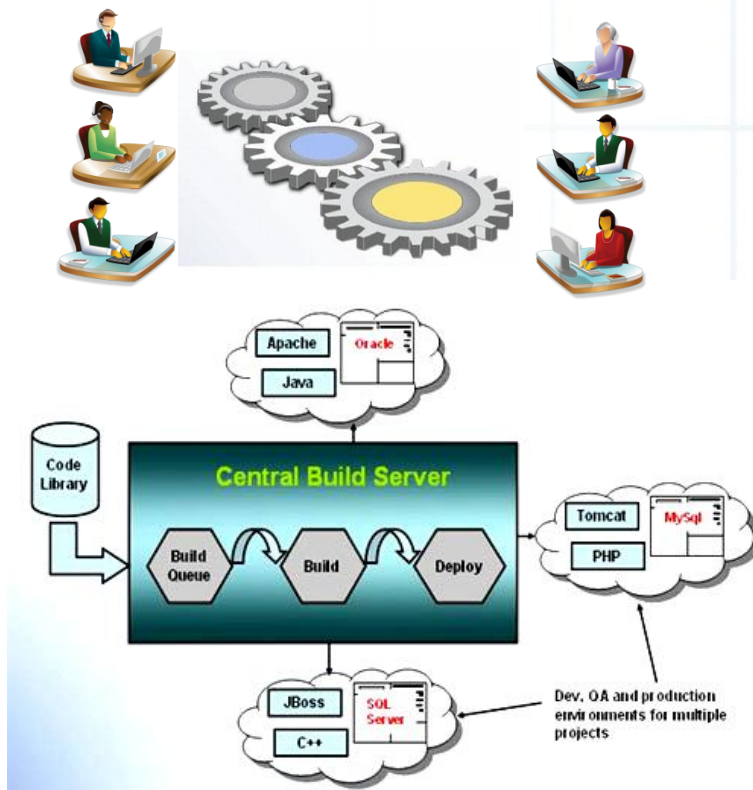

# Use simple tracking tools

- **Transparent tracking for all team members, regardless role / location**

# Continuous Integration

Issue /Defect Tracker

Version Control

Build Engine

Packaging and Release

Deployment Engine

- Commit code as early as possible
- Enable Automated Builds
- Make the build self-testing
- Keep the build fast

# CALL TO ACTION

**TRAVEL** across Distributed Locations

**ONE TEAM** thinking

State of art **COMMUNICATION** Tools

Simple and transparent **TRACKING**

**INSPECT** and **ADAPT**

# Enterprise Scrum Transformation in action

Henk Kolk

# Enterprise Scrum

- What is Agile / Scrum?
- What are the benefits and pitfalls of Scrum for large organizations?
- How do you transform large enterprise to an agile / Scrum delivery framework?

# Scrum Process

# Scrum Roles

## Scrum Master

- Facilitator
- Protector of the team
- Owner of the meetings
- Removes impediments

## Development Team

- Cross-functional team of 5-9 people
- Empowered and self-organizing for the technical realization
- Collective Ownership of the code and 'Definition of Done'
- Authority over the Sprint Backlog and the People

## Product Owner

- Business representative
- Owner of the
  - Vision
  - Product Backlog
  - Priorities
- Tracks progress, value and ROI

# Benefits of Enterprise Scrum – Large Bank

## Cheaper

- 30-50% Cost savings achievable in 2 - 3 years for a fairly large IT organization

## Faster

- Radical cycle time reduction, examples of 9 months -> 6 - 9 weeks

## Better

- More business value - earlier
- Higher quality of systems and increased transparency
- High Performance Teams

# Case Study (II) Current status

## Start Pilot projects: December 2010

- ACT Team formed: Summer 2011
- Over 30 Scrum Teams in Channels
- Over 20 Scrum Teams in Back Office Systems
- Time to market reduced from 9 months to 6 – 9 weeks

## First applications live with Scrum:

- Mobile apps, Internet (new architecture)
- Branches application
- Call Center application
- Savings system

# Case Study (III) First pilot projects were a big success

- *“In the same timeframe we normally needed to sign off the requirements, we now have finalized the software”*

Wim van der Zwam, Scrum Master

- *“Excellent coaching and expertise from Capgemini”*

Harold Wever, head of SoDC Branches

- *“We have removed two walls: One between Business and IT, the other between IT and supplier”*

Wim van der Zwam, Scrum Master

- *“The change to Scrum was fast and really easy”*

Wijke Stoker, change manager

in samenwerking met

## Distributed Scrum bij SoDC Branches & Sales Forces

ING OIB Channels en Capgemini leveren eerste software op met Agile/Scrum.

### Inleiding

Amir Arooni, hoofd van OIB Channels, heeft eind 2010 alle medewerkers uitgedaagd. Zijn vraag was: Kom met het beste idee om twee keer zoveel waarde te leveren voor dezelfde euro. Vanuit de medewerkers kwam van verschillende kanten een verassend antwoord: Wij willen dat met Agile/Scrum gaan doen.

### Wat is Agile/Scrum

Scrum is een veelgebruikte, wendbare softwareontwikkelingsmethodiek. Met minder lange processen en minder dikke documenten. Maar wel met een ijzeren discipline op proces, kwaliteit, continu verbeteren en verantwoordelijkheden van mensen. Scrum dwingt teams om software op te leveren die echt 'af' is, met een ritme van twee tot vier weken.

Scrum legt de verantwoordelijkheden helder neer bij de juiste mensen. Een Product Owner bepaalt welke functionaliteit prioriteit heeft en wat die functionaliteit is. Het Team van ontwikkelaars bepaalt zelf hoeveel van deze functionaliteit ze in staat zijn om in de volgende periode van een paar weken (een Sprint) te bouwen. De Scrum Master vrijwaart het Team zoveel mogelijk van inmenging van buiten, lost 'impediments' (hinderpalen) op en coacht Team en Product Owner.

### Kijkglas Team

Een van de Scrum-teams in Channels is het Kijkglas-team. Dit is een

“De invoering van Agile/Scrum als nieuwe aanpak ging echt heel snel en gemakkelijk.”

Wijke Stoker  
Change Manager  
Agile/Scrum Implementatie, ING

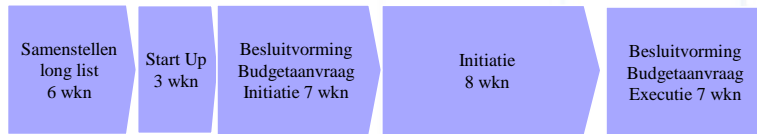

People matter, results count.

# Case Study (IV) Impressive Time to Market Benefits

## Project based approach (Before)

Longlist/Startup/Initiation: min. 21 – max. 31 weeks

Execution: ca. 16 weeks

TOTAL PROJECT: 40 – 50 weeks

## Before

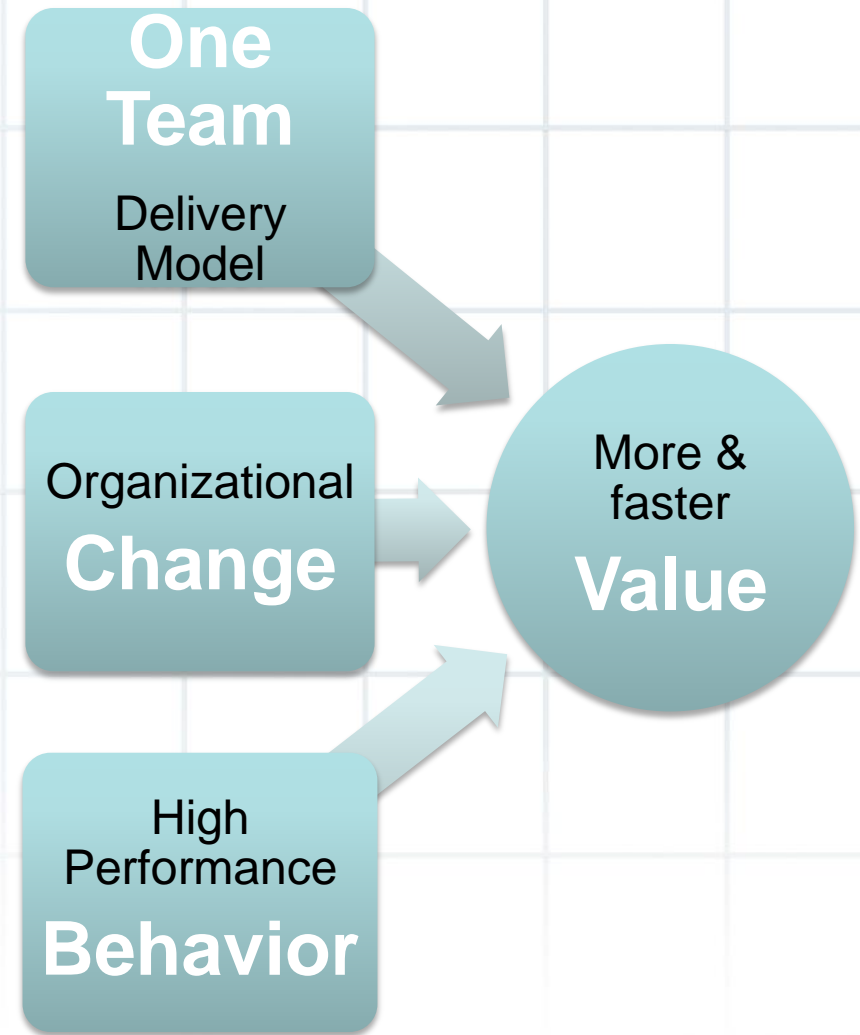

- Project initiation, 8 weeks
- Budgeting cycle, 14 weeks
- 3 x estimation effort, 3-6 weeks
  - 100%, 50% and 25% bandwidth estimation
- Requirements Mgmt overhead
  - Rewriting requirements multiple times
- Transition (Testing) – time to market of getting of sign offs – 6 weeks

## After

- 3 Sprints – total 9 weeks

# Critical Success Factors

- **One Team** delivery model. In working with vendors, create a one team model without hand-overs.
- **Organizational Change.** Scrum Teams will achieve much better when impediments that hamper productivity are removed constantly.
- **High Performance Behavior.** Scrum removes mechanisms that prohibit people from collaborating. Results come faster when teams are coached & trained properly.

# Playbook: The 5 Plays of the Game

## 1. Staging

## 2. Pilots

## 3. Expansion

## 4. Impact

## 5. Anchor

- ACT team established
- Defined sense of urgency
- ACT team trained
- Metrics established
- 1<sup>st</sup> Pilot projects decided

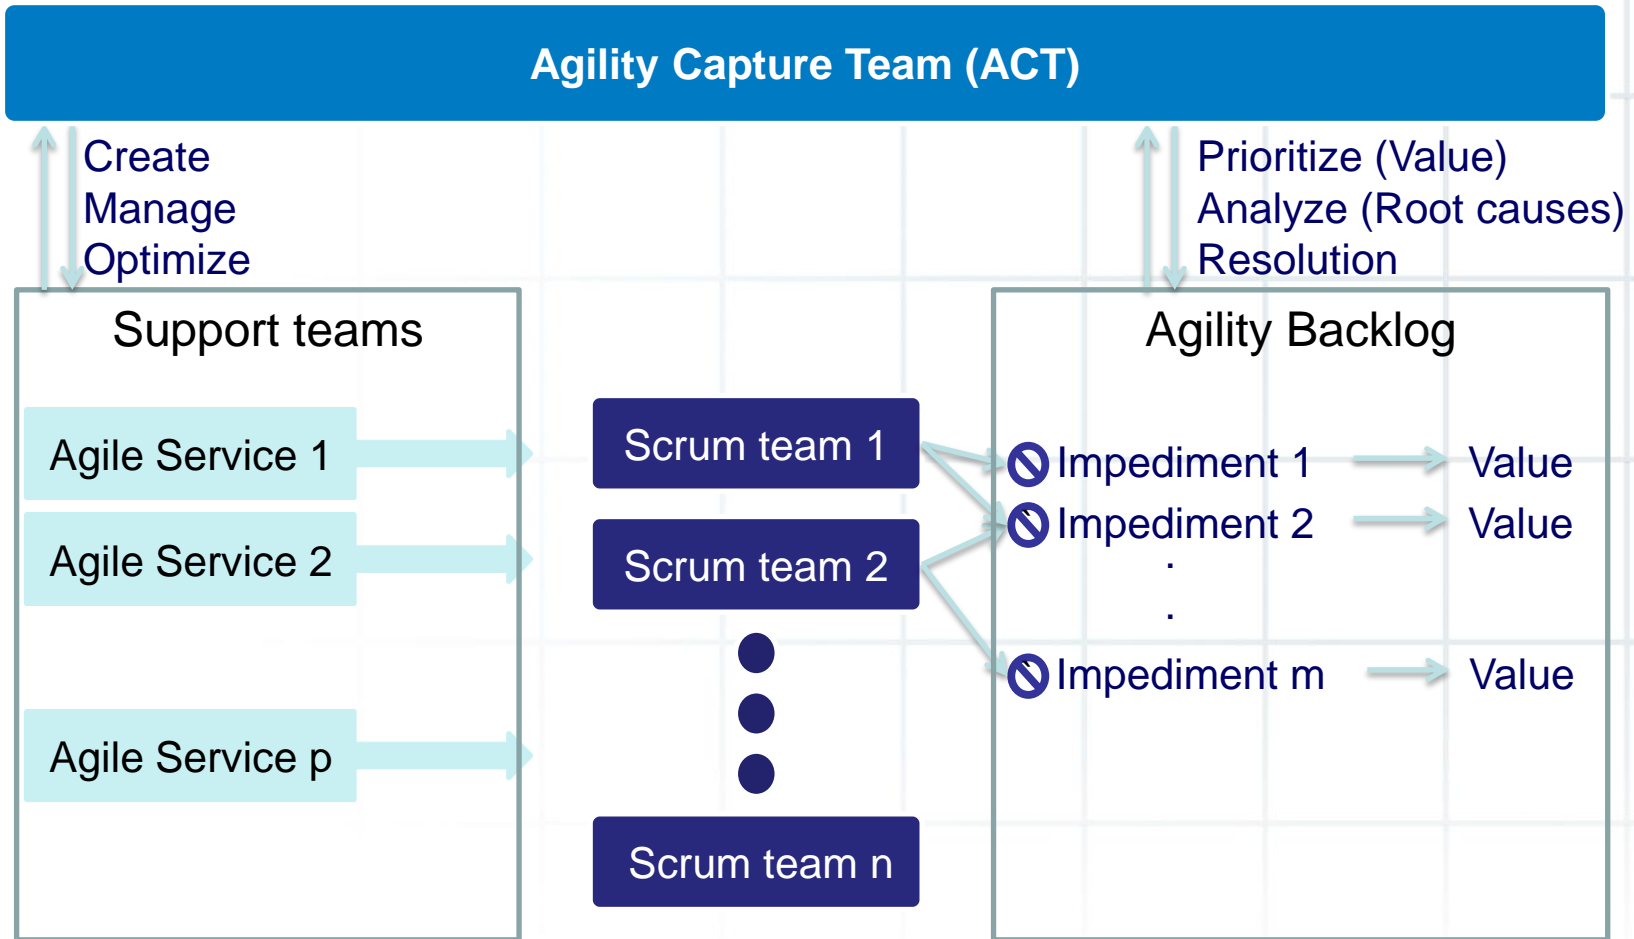

- ACT Sprints
- Scrum Teams
- First impediments resolved

- Expanding
- More Teams
- Resolving Impediments
- Organization
  - Technology
  - Infrastructure
  - Career paths
  - Structural training
  - Consolidated metrics

- Communicate results
- Cross fertilization
- Development oriented on applications and platforms
- More teams

- Agile organization
- Reduced waste
- Manage by corporate objectives
- Embedding in personnel objectives

# ACT Team solves impediments

# Thank you

## Henk Kolk

- Capgemini since 1999
  - Global Software Engineer
  - Practice Manager Accelerated Delivery Services
  - Chief Technology Officer – Financial Services NBS
  - Value Proposition Enterprise Scrum

*Mail [henk.kolk@capgemini.com](mailto:henk.kolk@capgemini.com)*

# Panel discussion

Facilitator : Lambert Swillens

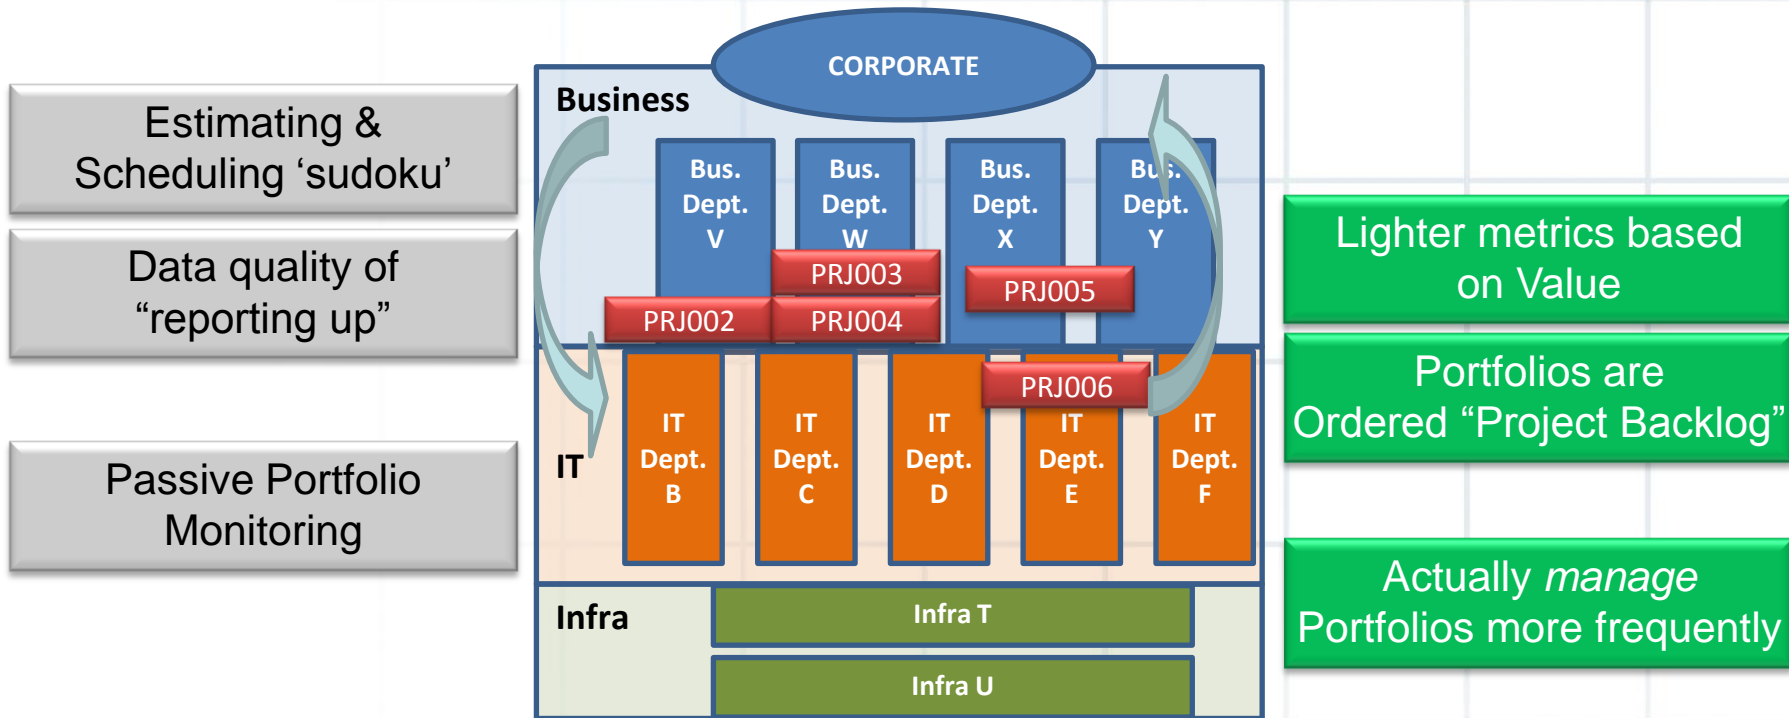

Director Operations & Delivery Financial Services NL-BE-CH

# Intro 'Growing to Agile Project Portfolio Management'

Yves Vervloesem  
Project Performance Improvement

# Growing to Agile Project Portfolio Management

PPM is a way to translate an enterprise's strategy.  
If PPM is more agile, the enterprise is more agile.

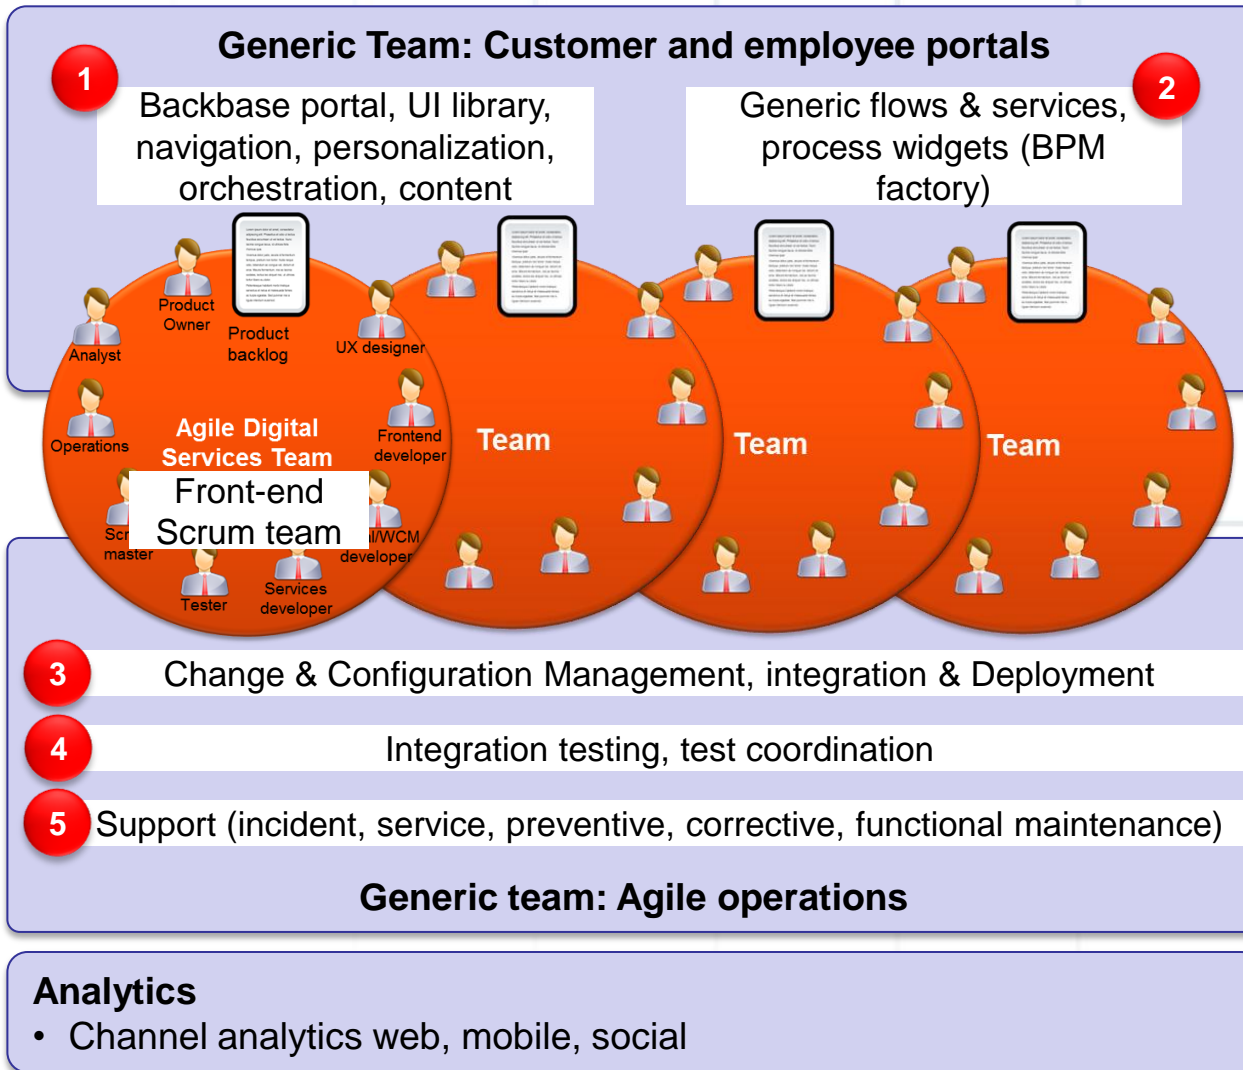

# Intro 'Scrum Agile Full Lifecycle'

Edgar van Buuren  
Service Delivery Manager

# Front end implementation IB

## Business demand

- Channel vision and strategy
- Channel roadmap for web, mobile, social
- Product backlogs for generic portals (shops)
- Product backlogs for specific widgets and process

## Channel Quality & Standards

### Experience

- Customer/User Experience, Experience & channel design guidelines
- Segmentation

### Content & Data

- Content & data guidelines for all channels
- Content editing

### Architecture

- Front-end & enterprise architecture (presentation layer) principles guidelines, tooling
