Presentation Event 17th March 2016 – TOBANIA

3 roads to professionalisation

Pascal Vanden Bossche (PMP) – pascal@propellor.be

PROJECT MANAGEMENT

3 roads to professionalisation

Pascal Vanden Bossche (PMP)

pascal@propellor.be

+32 477 61 92 39

We guide organisations towards successful project & change management.

To this end we train people and give pragmatic advice on the practical approach to accomplish the projects or the change. And we facilitate large and complex group processes that can make or break the desired change.

Professionalisation

- You?
- Others?
- What does it mean?
 - Better
 - Faster
 - Cheaper
 - Less stress...

Social constructionism

- Kenneth J. Gergen
‘An organisation is a set of relations between people’

Complex responsive processes

- Ralph Stacey
'Organisations are population-wide patterns of responsive processes that form a collective identity'
- As opposed to system thinking
'Organisations are a set of processes in which you can look for errors and improve them'

3 roads to professionalisation

- Top down, expert based
- Core team
- Co-creation

Top-down, expert based

- Often based on consultant's expertise
- Clear set of templates and guidelines
- Rolled-out to rest of the organisation

Core team

- Set of internal and external experts
- In interaction with community

- PMO driven
- Often incremental

Co-creation

- Based on experiments

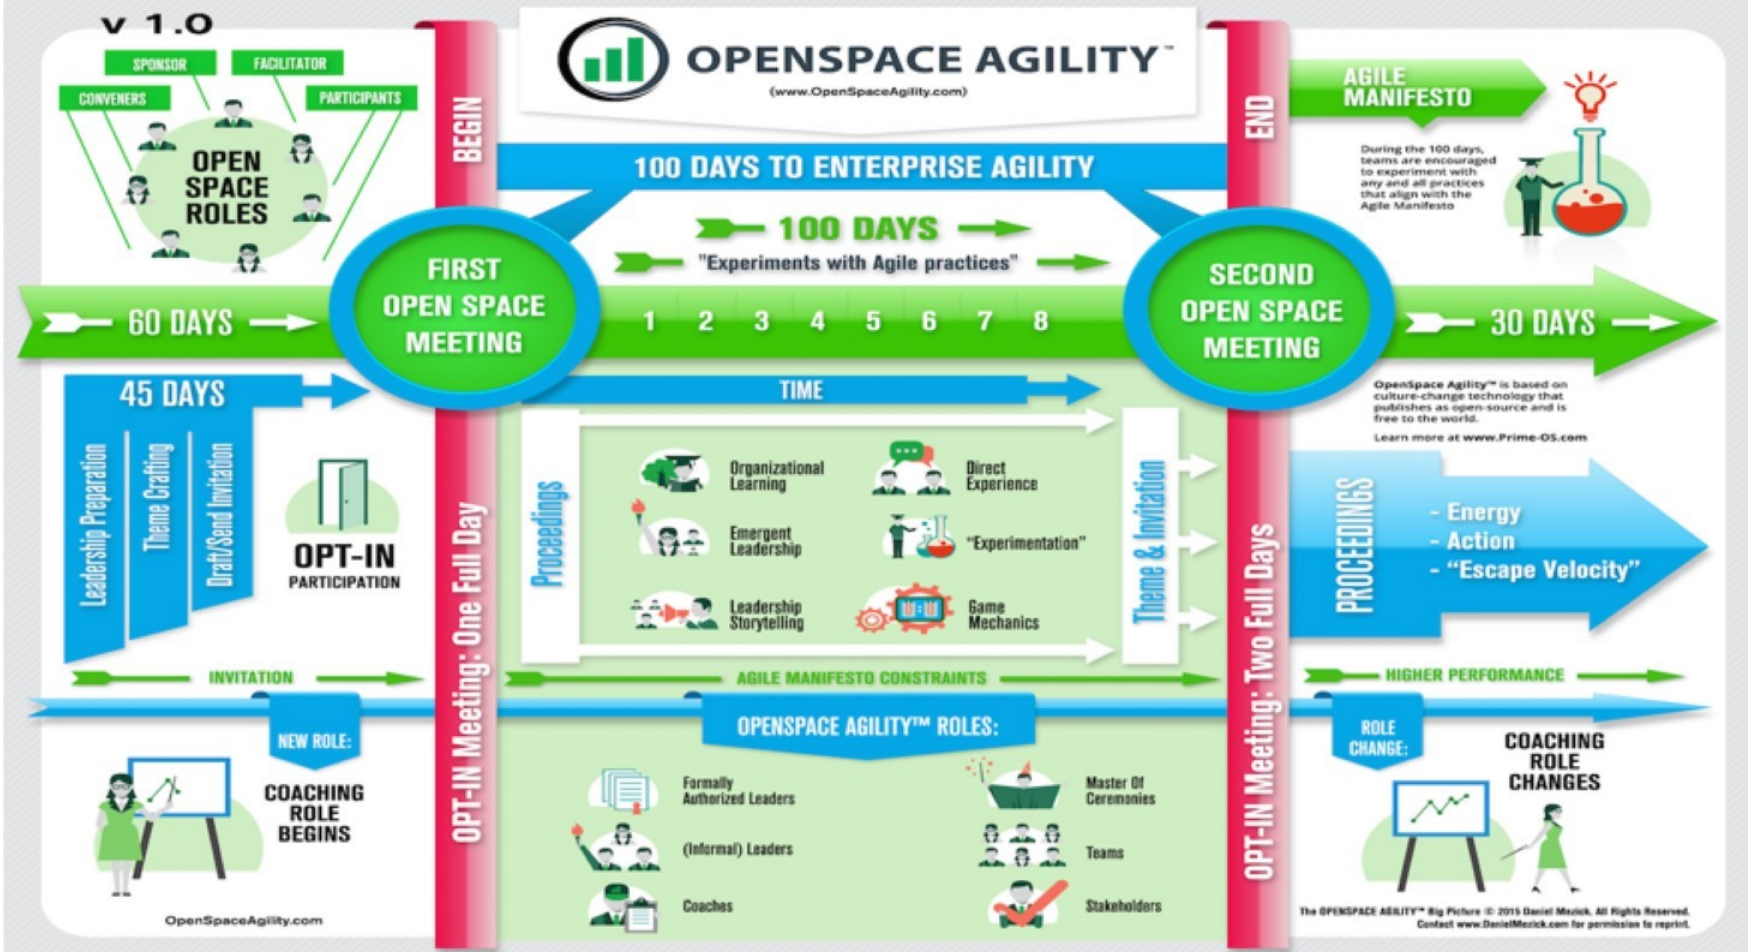

- Strict process but free on content
- Fail often, fail early ... and learn from it

Single Loop Learning

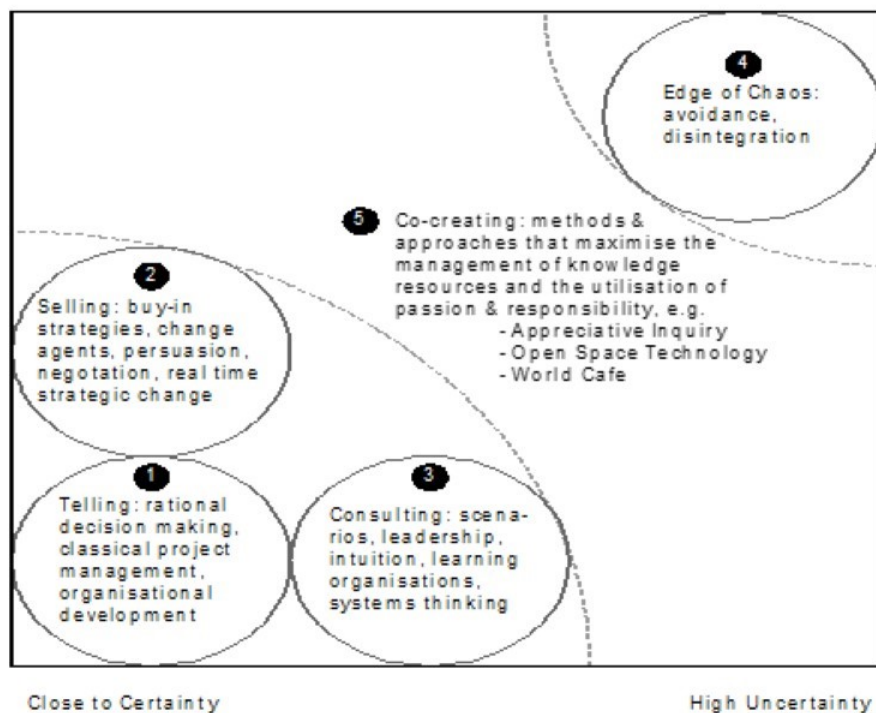

When to use what road?

Ralph Stacey

Disagreement

Close to Agreement

Perception

“L'enfer, c'est les autres”

Sartre

“Heaven is other people”

P.J. O'Neil Smyth

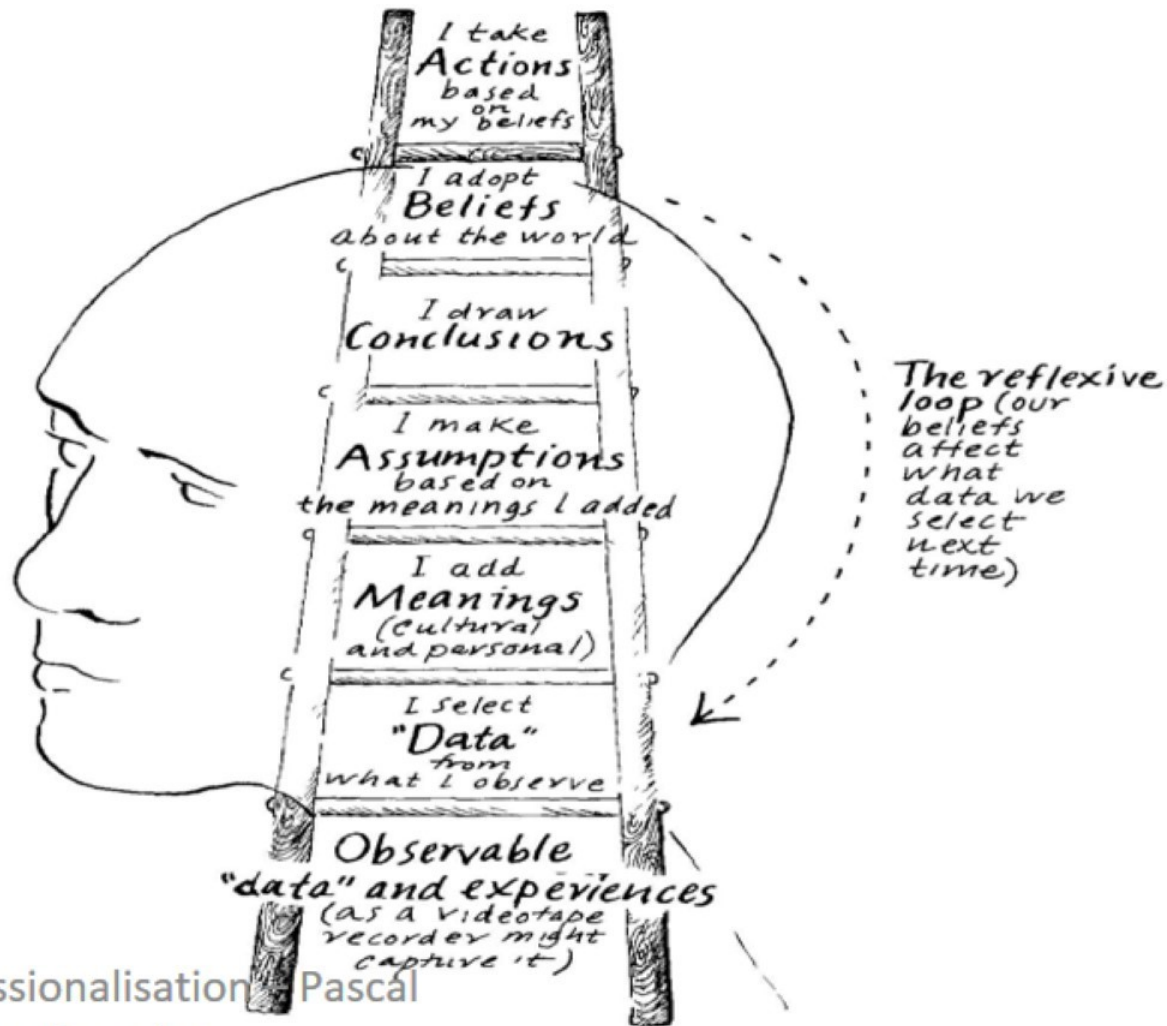

Our learning from co-creation

- Looks easy, ...
and it should look that way
but first and foremost mind the process!
- Get the whole system in the room
- Provide clear mandate by leadership to experiment
- Guard the process and keep it alive
- Trust people's ability to self-organize

Open space technology

Harrison Owen

- 1 law
 - The law of the 2 feet
- Guidelines
 - Whoever comes is the right people
 - Whenever it starts is the right time
 - Wherever it is, is the right place
- Process
 - Whatever happens is the only thing that could have, be prepared to be surprised!
 - When it's over, it's over
- Process
 - Opening circle
 - Agenda building
 - Discussions
 - Closing circle

The thesis project

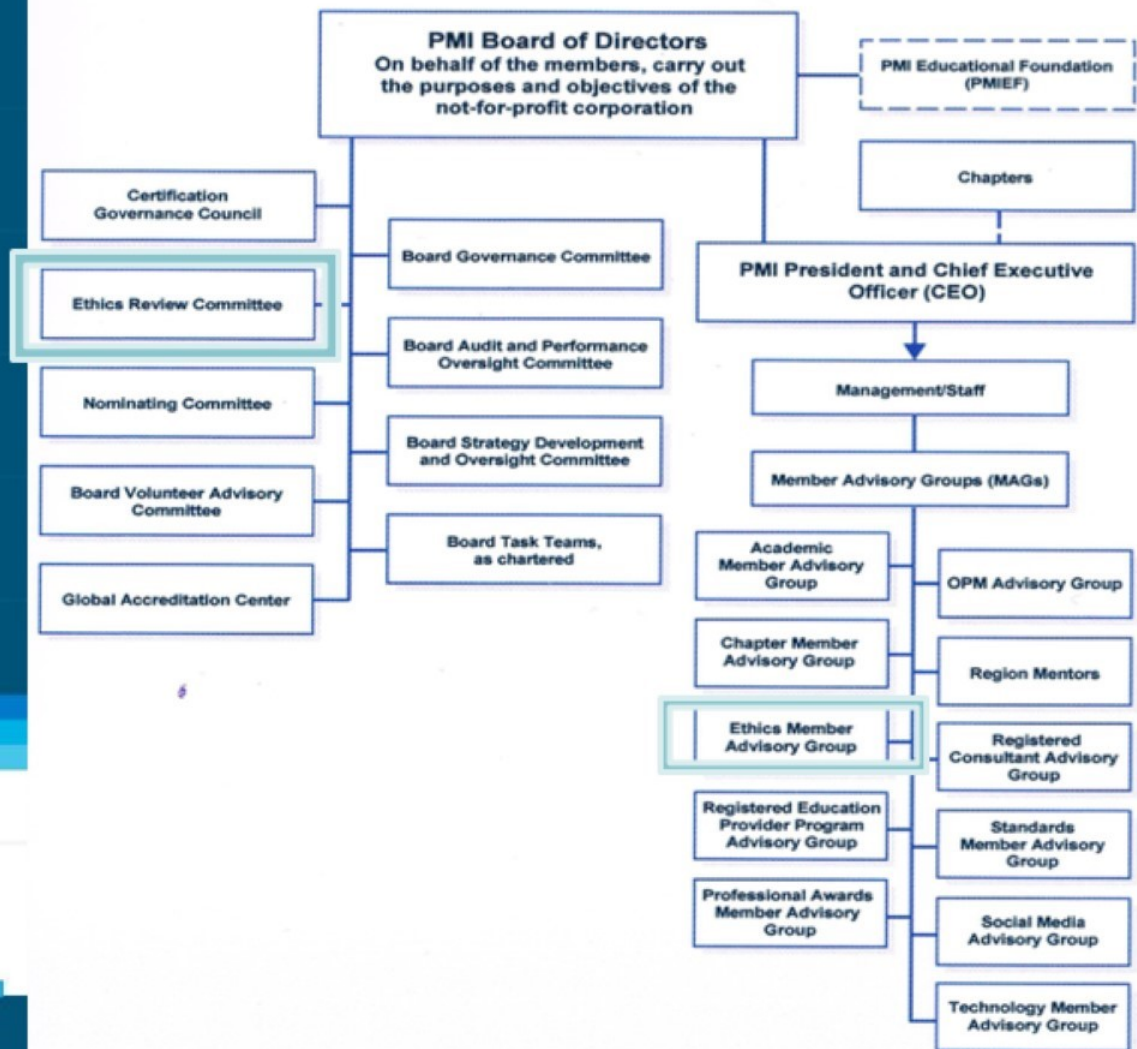

Very difficult this year due to the high quality of the thesises and a great winner!

The 3 thesises and our judgement

- Measures of Success and Critical Success Factors in Start-ups
 - Subject is nicely covered but less overall interesting for PMI
- A comparison between Critical chain/ Buffer management versus Agile
 - Interesting discussion about two methods, lots of fun for geeks?
- “De Waalse Krook”: Risk Assessment using the Fuzzy Set Theory
 - Very good study on Risk Management in Construction: interesting for everyone involved in Project Management
 - OUR WINNER!!!

Review Code of Ethic & Professional Conduct

Chris Kindermans

Code of Ethics and Professional Conduct

The Code

Responsibility is our duty *to take ownership* for the decisions we make or fail to make, the actions we take or fail to take, and the consequences that result.

Respect is our duty *to show a high regard* for ourselves, others, and the resources entrusted to us. Resources entrusted to us may include people, money, reputation, the safety of others, and natural or environmental resources.

Fairness is our duty to make decisions *and act impartially and objectively*. Our conduct must be free from competing self interest, prejudice, and favoritism.

Honesty is our duty *to understand* the truth and *act* in a truthful manner both in our communications and in our conduct.

 **Code of Ethics
and Professional Conduct**

CHAPTER 1. VISION AND APPLICABILITY

1.1 Vision and Purpose

As practitioners of project management, we are committed to doing what is right and honorable. We set high standards for ourselves and we agree to meet these standards in all aspects of our lives—at work, at home, and in service to our profession.

This Code of Ethics and Professional Conduct describes the expectations that we have of ourselves and our fellow practitioners in the global project management community. It articulates the ideals to which we aspire as well as the behaviors that are mandatory in our professional and volunteer roles.

The purpose of this Code is to instill confidence in the project management profession and to help an individual become a better practitioner. We do this by establishing a profession-wide understanding of appropriate behavior. We believe that the credibility and reputation of the project management profession is shaped by the collective conduct of individual practitioners.

We believe that we can advance our profession, both individually and collectively, by embracing this Code of Ethics and Professional Conduct. We also believe that this Code will assist us in making wise decisions, particularly when faced with difficult situations where we may be asked to compromise our integrity or our values.

Our hope is that this Code of Ethics and Professional Conduct will serve as a catalyst for others to study, deliberate, and write about ethics and values. Further, we hope that this Code will ultimately be used to build upon and evolve our profession.

1.2 Persons to Whom the Code Applies

The Code of Ethics and Professional Conduct applies to:

1.2.1 All PMI members

1.2.2 Individuals who are not members of PMI but meet one or more of the following criteria:

- 1 Non-members who hold a PMI certification
- 2 Non-members who apply to commence a PMI certification process
- 3 Non-members who serve PMI in a volunteer capacity

Comment: Those holding a Project Management Institute (PMI) credential (whether member or not) were previously held accountable to the Project Management Professional (PMP)® or Certified Associate in Project Management (CAPM)® Code of Professional Conduct and applicable to the full access available to the PMI Code of Ethics and Professional Conduct. In the past, PMI also had separate ethics standards for members and for credential holders. Stakeholders who contributed input to develop this Code considered that having multiple codes was undesirable and that everyone should be held to one high standard. Therefore, this Code is applicable to both PMI members and individuals who have applied for or received a credential from PMI, regardless of their membership in PMI.
